

IN THE CLAIMS:

Please cancel claims 1-8, without prejudice, and add new claims 12-16, as follows.

Claims 1-8, canceled without prejudice

Claims 9-11, canceled without prejudice

Claim 12 (new) A network system comprising:

individual service provider devices each having a first authentication server and access point terminals for connecting user terminals of contracted users of at least one of the individual service provider devices to a network;

a parallel service provider device connected to the individual service provider devices, the parallel service provider device having a roaming contract with the individual service provider devices and including a second authentication server; and

wherein each of the individual service provider devices comprises:

determining means for determining whether a user who issues a connection request from a user terminal is a contract member of the parallel service provider device;

transmitting means for transmitting the connection request to the parallel service provider device to cause the second authentication server of the parallel services provider device to perform user authentication when the user is a contract member;

authentication means for causing the first authentication server of the individual service provider devices to perform user authentication when the user is not a contract member; and

connecting means for connecting the user terminal to the network and charging

the user for connection when a result of user authentication is good.

Claim 13 (new) The network system according to claim 12, wherein  
the connection request comprises an e-mail address including a domain name of  
the parallel service provider device, and  
the determining means determines whether the user is a contract member based on  
the presence or absence of the domain name of the parallel service provider device in the  
connection request.

Claim 14 (new) The network's system according to claim 12, wherein the parallel service  
provider device is connected to the individual service provider devices through an exclusive line.

Claim 15 (new) The network system according to claim 12, wherein the individual  
service provider devices send respective user connection logs to the parallel service provider  
device.

Claim 16 (new) The network system according to claim 12, wherein the parallel service  
provider device comprises:

receiving means for receiving a user name for a user terminal of a user who  
requests a signup; and

further determining means for determining whether e-mail addresses including a  
combination of the input user name and sub-domains of the parallel service provider device has

been registered so as to register one of non-registered e-mail addresses.
